we look forward to seeing you again soon!

treatment  
**is not**  
immunity.

you can still get  
hep c after you  
have had  
treatment.

prevention &  
regular testing  
is still important.

 **hep c treatment**  
things have changed.

if you have  
cleared your hep c,  
you still need to  
protect yourself.

- not sharing
- use your own kit
- hand washing
- responsible disposal

 **hep c treatment**  
things have changed.

a tablet  
a day  
makes  
hep c  
**go away.**

hep c treatment  
involves taking 1-3  
tablets each day for  
8-12 weeks.

★ keep your  
tablets in  
a daily pill  
dispenser-

easy to remember,  
hard to lose.

you can still  
**clear**  
while using  
**gear.**

treatment is available  
for everyone  
with hep c.

★ hep c treatment  
things have changed.

your hep c can  
be treated  
if you are  
currently using.

hep c  
**repeat?**  
shame free  
**re-treat.**

got hep c again?  
re-treatment is  
available.  
no questions asked.
