	Samantha Jones - Member	Fiona		
	Christian Vega			
	Jane Dicka - Member			
	Snowy Primmer - Member			
	Nadia Gavin (x2) - Member			
	Frank Bees			
	Amelia Berg - Member			
	Ally Anketel			

	Nick Kent - Member
	Ben Yonson - Member
	Caro Weidner - Member
	Matthew Plumb – no
	Sarah Lord
	Jimmy Harrington
Guests	
Apologies	Tony Wyatt, Steph Tzanetis
Time meeting	4PM
commenced	

Agenda item/topic	Discussion/Motion	Moved	Seconded	Outcome
1. Welcome &	Robyn Dwyer, Board President and AGM chair welcomes everybody to the HRVic 2022			
Acknowledgement	Annual General Meeting. Introduces herself as a member of the HRVic board since 2011, and			
	the last 6 years as the chair of the board and AGM. Acknowledges the traditional owners and			
	custodians of the Wurundjeri lands on which she was hosting the meeting and all the lands on			
	which AGM participants were meeting. She paid her respects to Elders, past, present, and			
	emerging and extended this respect to all First Nations peoples joining us online.			
	Merri Bek which means rocky country- the council recently changed it's name to Merri Bek.			
	Also acknowledges the traditional owners and custodians of the land.			
2. Declaration of	None			
Conflicts of interest				
3. Minutes of 2021	To accept the minutes from the previous AGM, held on the 8 th of December 2021, as a true	Sam	Jane	All in favour.
AGM	and accurate recording of the meeting.	Jones	Dicka	RD declared
				the motion
				carried.
4. President's Report	Link to Annual Report was posted in the chat.			
	Thanks to HRVic staff, volunteers.			
	Annual report reflects HRVic's ability to adapt to change and align their work with the needs			
	of the community and enhance the lives of people with living experience.			
	All of our work is possible as people with lived and living experience.			
	Stuff about HRVic staff, teams and volunteers			

Agenda item/topic	Discussion/Motion	Moved	Seconded	Outcome
	Thank stakeholders and partners			
	Thank you to the highly productive and supportive relationships with the department of			
	health Thank you to fellow board members- monthly zoom meetings to fulfil governance			
	requirements			
	Farewell to outgoing board member Jarrod McMaugh and thanks to him for his time,			
	knowledge and experience.			
	Opportunity to welcome new members with 1x leaving- will get to that later The org is in great shape to meet the challenges of coming years			
5. CEO Report	Acknowledge Jarrod's contribution- we will continue working with him on advocacy			
	Welcome everybody, thank you for coming, strange to do it on zoom once again			
	AR will have more detail about each of the programs			
	This year has been a test to everyone's resilience			
	The reporting period covers time where there were outbreaks and lockdowns.			
	Despite Covid the year was overall one of reconnection			
	Restricted during the period on face to face peer work			
	Fundamental changes with the mental health commission			
	Major international conference coming to Melbourne			
	Renovated a warehouse to be a community organisation hub			
	Moved from 13 to 23 staff			
	HRI conf coming to Melb in April- Vic gov and DH funded a scholarship program to get living experience peer workers to the conference and give them the opportunity to be involved in			
	those conversations. Nick Kent has been brought into the team to develop as coherent as possible a policy platform leading into the conference- to highlight that HRVic is a leading voice on stigma. Ongoing process. We want to coordinate the things we say and repeat it so it			
	voice on stigma. Ongoing process. We want to coordinate the things we say and repeat it so it sinks in. Structural reforms like the royal commission. What is a drug user org in 23, 24 and			
	25. HRVic has a proud history of diversity in our communities, but we could do more to be more diverse. HRVic can lead the broader network on cultural diversity. What is harm			

Agenda item/topic	Discussion/Motion	Moved	Seconded	Outcome
	reduction? Is it inclusive enough on diversity? What will make our org more welcoming to a wider group?			
	Policy- Nick Kent, lucky to have someone with big picture mind to consider policy and a longer term process for strategic process			
	PAMS-Phone line has never been busier, more funding			
	FUSE- Christian and Matt hired, supporting the workforce of people with lived and living experience. Christian and Amelia to do a workshop at VAADA on cultural safety on Friday			
	DW- Undergone a number of changes, NW is coordinator, Bee stepped down, Ally and Liam staff, DW regularly work through the lack of understanding of HR that law enforcement has,			
	HPT- Delivery of It's Your Right Campaign- Jane, Brit and Caro. Partnering with St Vincents and Burnet Institute			
	COMMS- Sam Jones has helped us more than doubled our social media engagement			
	DOPE- Naloxone more available, online naloxone training once a month			
	Org Services- Jess, Snowy and Ben, move to new office outlined by Jess in our Annual Report. Thanks to Jess!!			
	Thank you to our funders			
	Also, thanks to board for sanctioning our spendings			
	New space to be a community hub as well as space for other orgs like Vixen and SSDP. Soon to all be able to work from this space			
6. Treasurer's Financial Report 2021-2022	Peter Higgs (Treasurer) Peter's first year as treasurer for HRVic- elected at 2021	Peter Higgs	Katia Lallo	All in favour. PH declared motion moved
	Dr Chooi Beh - Chartered Accountant conducted the 2021/22 audit. He delivered a satisfactory report with no concerns raised regarding organisational management of finances. Harm Reduction Victoria is able to pay all of its debts as and when they become due and payable.			

Agenda item/topic	Discussion/Motion	Moved	Seconded	Outcome
	Income of over \$2 million. Big chunk from state govt. About 60% or so spent on paying staff			
	and rest is allocated to programs. Plenty of resources. Much stronger financial position than			
	has been historically			
	Worked with AIVL and Burnet Institute which have both provided funding			
	Increased our surplus to a little over \$100,000 more than it was last year- about \$850,000 in			
	total			
	Been a successful year for the org and we're in a strong financial position.			
	Sione- worth noting that we've referred to our new premises most of the funding was done by HRVic's funds over years so our reserve will drop a little bit next financial year we were			
	able to pay for the renovations because we have had such successful previous years. Investment into staff and the org and community.			
7. Appointment of Auditors for 2022- 2023 Financial Year	Motion to appoint CH Accountants as auditors for 2022	Peter Higgs	Jane Dicka	All in favour
8. Board Vacancies	3 vacancies and 3 nominations.			
	RD asks nominees to introduce themselves			
	1. Katia Lallo- Been on HRVic board for 3 years. Would love to serve another year on the board. Background as a community lawyer.			
	2. Tony Wyatt unable to attend RD spoke on behalf- Experienced in governance like financial management. Tony also been connected with pharmacotherapy and has expertise. He's keen to contribute to HRVic.			
	3. Craig Harvey- Previous board member in 2016. Deep admiration for HRVic work happy to be involved. Worked in HR since late 90s, in Aus since 2006- a lot of time worked in pharmacotherapy and currently works in Geelong and can provide a rural perspective.			
	Because there are the same number of vacancies and nominees, we don't need a vote. Unless			
	there are any objections to any of the nominees from members. Nominees deemed elected.			
	Congratulations			
9. Other Business	None			

Discussion/Motion	Moved	Seconded	Outcome
Steph Tzanetis former employee of HRVic and current employee of CAHMA as a Peer Worker			
at CanTEST (Health and Drug Checking Service) in Canberra. A recording but happy to be			
contacted if anyone has any follow up questions. Acknowledgement of Country.			
CanTEST is a partnership- lead agency is Directions health working with Harm Reduction			
Australia's Pill testing Australia and CAHMA which is the peer-based organisation in the ACT.			
They also have the ACT government and ANU as partners. ACT government funds and ANU is			
doing the independent evaluation that's lead by Anna Olsen and also the chemists from the			
CanTEST Service Journey- a person walks into the CanTEST site which is in a multi-story			
building which has other services such as family planning, mammograms and NSP. CanTEST			
service is open to the public on Thursdays from 10am-1pm and Fridays 6pm-9pm. Slightly			
more popular on Friday evening but no overall pattern other than the number of people			
accessing the service is increasing. When the person first walks in they are asked to put their			
phone in a locker for privacy (hopefully to be removed), they are asked to sign a waiver form-			
paper based form which is put in a locked postbox- the main takeaway from the waiver is that			
regardless of the information you can get from the testing results you can't get a guarantee of			
safety, the outcome of someone using a substance is always dependent on a number of			
factors. You'll be greeted by AOD counsellors or peer workers who are part peer educator and

You'll be greete

Agenda item/topic	Discussion/Motion	Moved	Seconded	Outcome
	there's more capacity to do more tests (e.g. blood tests, STI screening) on the Thursday rather			
	than the Friday for the nurse.			
	FTIR testing: Starts by weighing the sample by taking a photo of it on a doc that gives n			
	indication of scale. Then you would get a spectra that is unique to the chemical which is			
	compared to those in a database with 10s of 1000s of chemicals. Tiny sample put on a			
	diamond plate and putting a infrared light on it. Fourier-transform infrared spectroscopy			
	(FTIR) is quantitative not qualitative- an indication of a substance and a score out of 1000 for			
	confidence. >750= high confidence, 600-750= lower confidence, <600= low confidence. It gets			
	complicated if there are more than one substance involved generally the FTIR testing can only			
	indicate up to 2 components and they need to make up at least 5% of the sample tested. All			
	FTIR samples are retained for subsequent analysis by the ACT Govt Analytical Laboratory			
	(ACTGAL) for quality assurance. Info sharing between ACTGAL and ANU was really important			
	for both of their methods.			
	A piece of equipment which is new to the fixed site service that wasn't present at the GTM			
	pilots is the Ultra-Performance Liquid Chromatography-Photo-Diode Array (UPLC-PDA)			
	analysis. Supplied by analytical partner Water Australia, separates compounds using liquid			
	chromatography. Detects compounds using UV- visible spectroscopy. Identify and quantify 10			
	target drugs. Detect but not identify non-targeted drugs. A running race where the amount of			
	time it takes a substance to go through a column tells you what substance it is. UPLC			
	targeted compounds are morphine, heroin, amphetamine, methamphetamine, MDMA, MDA,			
	PMA, MDEA, Ketamine, Cocaine- if you have a substance that is something not targeted-			
	you'll still have a peak, but you won't know what that is. This can be followed up with GC-MS			
	testing afterwards. If people are returning to the service a week or 2 later there may be			
	additional information. Working on a multi-disciplinary team including chemists is interesting			
	and challenging- scientific analogies used very useful and can improve harm reduction			
	messaging and refine health promotion messages.			
	Fentanyl Test Strips (FTS) work like a rapid antigen test. Detect the presence of fentanyl but			
	what is important is the dilution ratio, claimed limit of detection for fentanyl is 20 ng/mL.			
	Lateral flow immunoassay for the detection of fentanyl and fentanyl derivates. Involves			
	dissolving 1mg of drug sample in 1mL of water (1 mg/mL), dip test for 10-15 seconds and			
	develop for 5 mins. Note a test band (T) disappears when drug is present, control band (C)			
	must be present (e.g., opposite of a COVID RAT).			

Agenda item/topic	Discussion/Motion	Moved	Seconded	Outcome
	Follow up GC-MS analysis			
	Combination of UPLC and FTIR. Step 1- Like UPLC, Gas chromatography (GC) splits samples up			
	into components like UPLC, each peak is a separate substance. Step 2- Like FTIR Use mass			
	spectrometry (MS) to generate a spectrum which is matched against an international library			
	to identify substance. It can identify very small components of mixtures like benzos in pressed			
	pills, identify novel research chemicals as the libraries are more expansive than FTIR and			
	identify most unknown peaks in a UPLC sample. It cannot give results in less than half an hour			
	or be deployed in a small, carpeted room, having an aircon on. May not be able to get results with less than 5% of a sample.			
	CanTEST is on Facebook, Instagram, Twitter and has a subreddit and you can see a snapshot			
	of each month- number of tested substances by kind of substance, purity- e.g. cocaine purity			
	is guite low compared to cocaine, also tracks trends. More than 600 samples tested.			
	CanTEST detected a fluorinated ketamine derivative that had not been detected on the illicit			
	market before.			
	First red alert at the service was in December of 2022 and it was a counterfeit Oxycodone pill			
	where a novel opioid which is essentially stronger and more risk than fentanyl was detected.			
	Another thing that has been highlight by drug checking is all the different fillers present.			
	Lactose: milk sugar in MDMA pills and powders, likely easy to press, Creatine: pre-workout			
	seen in many things, readily available and generally safe white powder, Dimethyl sulfone			
	(MSM): food additive & anti-inflammatory seen in MDMA due to it's crystalline appearance			
	and ease of pressing, Sucrose/glucose/inositol: sugar seen in many things, generally safe			
	white powders, Caffeine: simulant commonly seen in cocaine for it's stimulant effect and			
	Procaine/lidocaine/benzocaine: local anaesthetics commonly seen in cocaine and ketamine			
	for numbing effect. Results for 'peanut' or 'licorice' are just general detections of starchy			
	fillers, unlikely to be any peanut or licorice present.			
	Check out the interim report which is currently out which provides an evaluation of the first 3			
	months of CanTEST service delivery and we are awaiting the final report which will dive a little			
	deeper into the service.			

Time meeting closed	5:16PM
